RESPONSE TO RESTRICTION REQUIREMENT

Honorable Commissioner for Patents
Washington, D.C. 20231

RECEIVED
FEB 25 2002
TC 1700

The Office Action of February 1, 2002, in the nature of a requirement for restriction, has been carefully reviewed. Favorable consideration is respectfully requested.

Restriction has been required between what the Examiner considers to be three patentably distinct inventions, namely,

Group I directed to a process for making a dryformed absorbent web, presently comprising claims 1-9;

Group II, drawn to an apparatus for preparing a dryformed absorbent web, presently comprising claims 10-12; and

Group III, directed to a dryformed absorbent web, presently comprising claims 13-22.

Applicants hereby provisionally elect, with traverse and without prejudice, claims 1-9, Group I, directed to a process for making a dryformed absorbent web.

This restriction requirement is traversed on the basis of MPEP Section 803, second paragraph, which requires that there be a substantial burden in examining plural groups, even if the restriction requirement is otherwise correct. In the present case, claims 13-22 are directed to the dryformed fibrous web made by the method of claims 1-9. It is respectfully submitted that different classification for the groups is largely immaterial, since it is assumed that the Examiner will search online rather than manually, and that a search which encompasses the medium would necessarily include methods of using the medium. Since there appears to be no serious burden, the restriction requirement should be withdrawn, and such is respectfully requested.

If the restriction requirement is maintained, it will be clear on the record that the PTO considers the two groups to be patentably distinct from one another *i.e., prima facie non-obvious* from one another. This means that a reference identical to the one group would not render one of the other groups *prima facie* obvious.
